

Slow and Steady Always Wins

44

Product Description

PolyWorx™ 44 polymer coated urea is a high performance turf & ag product developed in 2008. The patented, Gal-XeONE™ dual monomer polymer coating delivers just the right amount of nutrients to match the pace of turf growth. PolyWorx™ CRF polymer coated urea has a 100% durable polymer coating, that can hold up to the elements.

Features

- A true 45 day release
- Eliminates delayed start associated with older crf technology
- Rigorous QA/QC process with batch production
- Designed to endure stressful environmental conditions

Benefits

- Predictable nutrient availability
- Improved initial crop response
- Tested at 100F to avoid catastrophic failures
- Lasts in hot and humid climates

44-0-0

Guaranteed Analysis

Total Nitrogen (N)*	44%
44% Urea Nitrogen	
Chlorine (Cl) Not More Than	1.00%

Derived From

Polymer Coated Urea

*The Urea has been polymer coated to provide 44% Slow Release Nitrogen (N).

Polyworx Coating Details

The proprietary GAL-XeONE next generation polymer coating was created with support from NASA's Space Alliance Technology Outreach Program.

GAL-XeONE allows water to seep into the prill and then carry the nutrients out through a semipermeable membrane and into the soil.
